

Southern African Chrome. International Market Access.

Rivulet Chrome Solutions connects chrome supply in South Africa and Zimbabwe with international buyers, with a particular focus on China.

Sourcing, procurement and trade facilitation.

50,000 t

Potential supply across two origins

40.23-47.14%

Cr₂O₃ in reported samples

Supply volumes, availability and quality are confirmed for each transaction.

A local partner for international procurement

You define the requirement. We identify, verify and coordinate suitable supply.

We support buyers through supplier identification, product verification and commercial coordination. Our regional network provides a point of contact between Southern African suppliers, logistics partners and international procurement teams.

01

Define

Grade, chemistry, volume and delivery requirements.

02

Identify

Match requirements to suitable suppliers and material.

03

Verify

Review availability, supplier documentation and assays.

04

Coordinate

Agree commercial terms and support execution.

Regional presence / Multiple supply sources / Clear buyer communication

Our Southern African network

Two supply origins. Sourcing aligned with buyer requirements.

SOUTH AFRICA

Regions

Mooi-nooi and Rustenburg

Product

Chrome concentrate (fines)

Supply access

Up to 30,000 tonnes under supplier agreements; expected availability from the end of October 2026.

Reported sample grades

40.23-41.50% Cr2O3

ZIMBABWE

Regions

Mvurwi, Lalapanzi and Mutorashanga

Product

Chrome fines

Supply access

Up to 20,000 tonnes across a network of more than 10 mine and supply locations.

Reported sample grades

40.88-47.14% Cr2O3

Volumes reflect the stated supply network, rather than a guaranteed shipment allocation. Current stock, production availability, sampling and buyer specifications are confirmed before commitment.

Supply specifications

Reported laboratory results. Final shipment specifications are agreed per transaction.

SOUTH AFRICA / SIX SAMPLES

Parameter	Range	Average
Cr2O3 (%)	40.23-41.50	40.75
Cr:Fe ratio	1.35-1.38	1.36
FeO (%)	26.11-26.55	26.30
SiO2 (%)	3.44-5.35	4.33
Al2O3 (%)	15.44-16.92	16.21
MgO (%)	9.60-10.53	10.16
CaO (%)	0.29-0.62	0.46
P (%)	0.005	0.005
S (%)	0.005	0.005
Moisture (%)	2.56-3.94	3.46
Size: -1 mm (%)	98.64-99.97	99.55

ZIMBABWE / TWO SAMPLES

Parameter	Site 1	Site 2
Cr2O3 (%)	47.14	40.88
FeO (%)	24.70	18.34
SiO2 (%)	2.20	2.14

Zimbabwe: wet chemical analysis by the University of Zimbabwe, Department of Soil Science and Environment. Report dated 3 September 2026.

Sample-specific results

Historical assays describe the tested samples. Representative sampling and buyer review are required for each proposed lot.

South Africa: stockpile sampling dated 14 September 2026; analysis by Mitra S.K. South Africa (Pty) Ltd, Richards Bay. Figures reproduced from the supplied profile; original reports available on request.

Quality and verification

A clear review process before commercial commitment.

01 Supply identification

Confirm the source, product type and current stock or production availability.

02 Representative sampling

Agree sampling arrangements for the proposed stockpile or lot.

03 Laboratory analysis

Review product chemistry, grade, moisture and size against buyer requirements.

04 Buyer review

Share available results and supporting documentation for procurement assessment.

05 Commercial agreement

Agree quality parameters, inspection arrangements and commercial terms between the relevant parties.

Documentation

Laboratory reports and supporting verification documents are available on request.

Inspection and acceptance requirements are agreed for each transaction.

Logistics and export coordination

Support from the source to the agreed delivery point.

Through regional relationships, Rivulet can assist with local transport, cross-border logistics and export documentation. The delivery scope, responsibilities and route are agreed for each transaction.

Source

Mine or stockpile in Zimbabwe or South Africa

Inland movement

Collection, loading and transport coordination

Export corridor

South Africa or Beira, Mozambique

Destination

International shipping arrangements as agreed

LOGISTICS RELATIONSHIP

Veer Freight

Supports movement from Zimbabwe into South Africa and toward Beira, Mozambique.

EXPORT DOCUMENTATION

Zimbabwe export permit and documentation support are available through the operating network. Applicable documents and shipment requirements are confirmed before movement.

Transport, export and shipping assistance is subject to the agreed commercial scope. Routes, port access and transit timelines are confirmed per shipment.

MEET THE DIRECTOR

Takunda Chanakira

Director | Rivulet Chrome Solutions

Takunda focuses on supplier relationships, supply coordination and commercial execution across Southern African chrome markets. His approach centres on clear communication, practical coordination and long-term buyer relationships.

EDUCATION

BSc Business and Administration
Royal Holloway, University of London

MSc Advanced Marketing
University of Liverpool
